RUPTURE

 Shallenberger Rupture Establishment
 will demonstrate

their method without charge or obligation to any sufferer of rupture who is interested in a sane and sensible non-operative method for the proper retention of rupture, which contracts the opening in a remarkable short time on the average case regardless of size or location and puts you back to work the same day as efficient as before you were ruptured.

The Shallenberger rupture shield has no leg straps, waterproof, sanitary, practically indestructible, can be worn while bathing. Each shield is skillfully molded and fitted to the parts under heat, which gives a perfect fit and satisfaction.

Remember: Any rupture is dangerous, that all large ruptures were once small, that neglect may result in invalidism and loss of earning power.

Do not overlook this opportunity if you want gratifying results.
