## Important Notice to Toll Users

It is particularly desirable that the toll using public have a thorough understanding of the different classes of toll service which may now be obtained. The rates for "Station to Station," and "Evening and Night" service are considerably less than the "Person to Person" service. A careful study of the different classes of toll service, listed below, should therefore be made.

The classes of service offered are "Station to Station," "Person to Person," "Messenger and Appointment," and "Evening and Night."

**"STATION TO STATION" RATE**—When a person makes a toll call for a particular person and the conversation is held, the "person to person" rate applies. Calls of this kind should be made by number whenever possible. They may, however, be placed by giving the name. Telephone number is listed under at the called point and requesting "Station to Station" service, or by requesting conversation with any one who answers the telephone.

**"PERSON TO PERSON" RATE**—When a person makes a toll call for a particular person and the conversation is held, the "Person to Person" rate applies. As this service requires a greater amount of operating effort and use of toll circuits, the rate is about one-fourth greater than the "Station to Station" rate. For this class of calls the day rate applies whether the call is made during the day or night. A collect call takes the "Person to Person" rate.

These calls are subject to a "report charge" made under certain conditions as explained later.

**"MESSENGER AND APPOINTMENT" RATE**—When the calling party specifies a definite time at which he will talk and the conversation is held the "Appointment" rate applies. The "Appointment" rate is approximately one-half greater than the "Station to Station" rate. The day rate applies whether conversation is held during the day or night. For "Messenger" calls the rate is the same as the "Appointment" rate, plus the actual messenger expense.

**"EVENING AND NIGHT" RATES**—Reduced rates for night service for "Station to Station" calls are in effect after 8:00 p. m.

From 8:30 p. m. to midnight the rate is about one-half of the day rate.

These reduced rates apply only to "Station to Station" service.

**"REPORT CHARGE"**—When a "Person to Person" call is made and the particular person desired is not in or will not talk, or when an exact telephone address of the particular person desired has not been given, and he cannot be reached at a telephone within one hour, a "report charge" applies. This charge also applies if the calling party is absent when the connection is made within one hour, or if he refuses to talk. This charge is to cover compensation for the operating work performed and use of toll circuits, and is approximately one-fourth of the "Station to Station" rate if a report is made and the call is completed later in the day the report charge is cancelled.

---

### Terms:

Telephones are rented by the year, rent to be paid monthly.

All subscribers, except rural subscribers shall pay all charges for each calendar month on or before the 15th day in each calendar month. All rural subscribers shall pay all charges on or before the 15th day of the second month of each quarter.

If charges are not paid on or before the last day fixed for payment the service will be promptly discontinued without notice by the company.

Charges for Long Distance calls positively will not be charged to non-subscribers.

All charges are payable at the office of the Star Telephone Company in French Lick. Come to the office to pay rent or mail your check.
